**Pin Shackle Key**

Tightens or loosens pins on most galvanized anchor shackles and stainless steel pin shackles

**Bottle Opener**

Enough said!

**FAQ's**

**Why add button snap and zipper pull features?**

Canvas shrinks and snaps corrode. When this happens, zippers are harder to pull and snaps don't quite line up like they used to when the canvas was new. One of the button snap tools is designed to grip and pull snaps; the other to pry them apart.

**Is this a powerboat product?**

Yes and no. It's a tool for ALL outdoor markets. This tool fits into MANY more markets than our deck plate key.

**Is the Davis #381 being discontinued?**

It will be phased out and replaced by the new #382. Our customers can still buy the existing key for a time, but they should supersede it with the new one in the fall. The #382 will have a built-in customer base.

**Will there be a "tent display" for the new #382?**

No. The #382 comes on a tent card in four languages that describes it well. The card is its own POP display.

**Can the line cutter be re-sharpened?**

It is possible, but please do not use this as a selling feature.

**Is it still a deck plate key?**

Yes! We have not lost any of the features from the #381. This key still opens most, if not all, deck plates made today and yesterday.

**How strong is the Snap Tool Multi-Key?**

We have bent all the deck plate keys we can find and ours is still #1. It is stamped from 304 stainless steel and thicker than most others.
