

**HIGH POLISHED 316L  
STAINLESS STEEL**

The 316L stainless steel casing does not rotate; line rotates inside on hub and does not interfere with nearby equipment.

**HOLE GUIDES**

Provides guide for length of line-deployed and avoids that the flat rope to dry quickly.

**MOUNTING BOLTS**

Housing bolts are also incorporated into the mounting system for rail and deck mounted installations.

**TWIN ROLLERS**

Teflon rollers and stainless steel guides squeeze excess water from flat rope while leading it into the reel.

**ROPE GUIDES**

Scale indicates approximate amount of line in use.

**MULTI FUNCTIONAL  
WINCH HANDLE**

316L, multifunctional handle fits a standard winch handle-socket and includes three keys for opening deck fittings as well as a shackle buffer.

**FLAT ROPE**

Flat ropes are UV resistant will run through 1" sheaves and when folded can fit into the jaws of a self-tailing winch. Flat rope is easily belayed to standard deck cleat.
