

West Marine®

PURE OCEANS®

Salt-Off

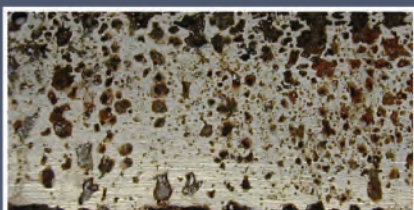

WEST MARINE® PURE OCEANS® SALT-OFF REMOVES SALT DEPOSITS AND LEAVES A PROTECTIVE COATING THAT INHIBITS FUTURE CORROSION. AND IT DOES IT BETTER THAN THE COMPETITION!

The Humidity Cabinet Test (ASTM D 17 48) subjects metals to 100% humidity to simulate lengthy, harsh exposure found in the marine environment. Left untreated, metals will quickly show signs of surface corrosion. We subjected an untreated metal panel, a metal panel treated with a leading competitor's salt inhibiting product and a metal panel treated with West Marine® Pure Oceans® Salt-Off to this test. The untreated panel shows severe corrosion over most of its surface. The competitor's panel shows signs of corrosion in numerous areas while the panel treated with Pure Oceans® Salt-Off is virtually rust-free.

- Quickly and effectively removes salt deposits from all surfaces
- Provides a durable polymer barrier to help prevent future deposits
- Can be used as an engine flush to help protect engines used in salt water
- Ideal for fishing tackle, dive gear, trailers and all other equipment exposed to salt
- Available in Concentrated form in 32 fluid ounce and 1 gallon sizes
